PROJECTS

Job Portal - MERN Stack | React.js, Node.js, Express.js, MongoDB, JWT

Live Project: View Live Project

- Developed a full-stack job portal application using the MERN stack.
- Implemented separate functionality for Job Seekers and Recruiters.
- Built user authentication and authorization using JWT.
- Developed REST APIs for user and job-related operations.
- Implemented CRUD functionality for job listings and application management.
- Developed the backend using Node.js and Express.js.

Aivon Tech - Digital Services & Web Development Agency

Live Project: View Live Project

- Architected and launched the official web platform for Aivon Tech, delivering a responsive and high-performance digital
- experience using React and Tailwind CSS.
- Integrated interactive UI components and custom animations using Framer Motion and React Router DOM to strengthen
- user engagement and brand presence.
- Built an interactive AI chat widget for automated client inquiries and improved lead interaction.
- Managed end-to-end deployment and version control using Git, GitHub, and Netlify.
